

Partial Assembly - Caladium Combination Pots

Step

1 Partially fill 10" pot with soil

2 Place 4" pot in center

3 Add additional soil on the perimeter to proper planting depth

4 Place perimeter variety bulbs in pot

5 Fill both 10" and 4" pots to proper finish depth

6 Place filled pot in germinator or on growing bench

7 Wait the necessary 1-3 weeks depending on crop times

Partial Assembly - Caladium Combination Pots

8 Remove 4" pot

9 Place some of the soil from the 4" pot into 4" hole to proper planting depth

10 Place center variety bulb in the hole

11 Cover with remaining soil from 4" pot and pat down

12 Place in germinator or on growing bench
